

Air Control Panel

The **Dense Flow Air Control Panel** houses all the primary air delivery components for JDB Dense Flow Dense Phase Pneumatic Conveying Systems in a NEMA 4/12 enclosure, and all components within are delivered fully assembled and tested.

The Air Control Panel acts as the nerve center for the Dense Flow Advanced Air Delivery System, and includes the necessary filters, regulators, solenoid valves, etc. for Dense Phase conveying operations.

Features

- NEMA 4/12 Enclosure
- Fully Assembly
- All Components Tested
- Air Filter
- Solenoid Block

Benefits

- Lower Installation Costs
- No Assembly Required
- Efficient Air Delivery

Applications

- JDB Dense Flow Dense Phase Conveying Systems
