

Electric Control Panel

The **Dense Flow Electric Control Panel** features a color touch screen display housed in a NEMA 4 enclosure. The panel performs all electrical communication to the Dense Flow Air Control Panel and includes the proprietary program and sequencing for the Dense Flow Advanced Air Delivery System used on all JDB Dense Flow Dense Phase Conveying systems.

The Electric Control Panel allows system operators to view JDB Dense Flow Dense Phase System function, and make changes to system settings through a password protected screen.

Features

- NEMA 4 Enclosure
- Color/Touch Screen Display
- All Components Tested
- On/Off Disconnect
- Fully Assembled Panel

Benefits

- Lower Installation Costs
- No Assembly Required
- Efficient Air Delivery

Applications

- JDB Dense Flow Dense Phase Conveying Systems
